

Purecath

Self - Catheterization Set for Woman

1. The design of catheter case.

Since the catheter case has not only good performance as medical device but also fashionable design, it does not look like medical device at first glance.

3. The strap with hook.

Since this strap has hook, it can be hooked anywhere and easy to get it out.

5. Reusable type.

After using the catheter, if it is washed and stored in the sterile liquid it can be used for one (1) month as reusable product.

2. High flow catheter.

This catheter made from all silicone that has a good performance of biocompatibility. Since its lumen is wider than the other Self-Catheterization products, the time of urethral catheterization can be shortened.

4. The case cap.

Since the case cap is designed as an oval to be held easily, woman can open and fasten it easily. When the user intends to open, since twist the cap and it will be come up, the catheter can be picked up easily. On the other hand, when it is closed, only push the cap and it comes to fix the cap and its case. Moreover, the marks where are on the cap and case indicate correct position to be fastened firmly.
