 Read the package insert before using the product.

Product features

〈5 ideas to keep the urinary tract safe〉

- ① The renal pelvis insertion part is pre-bent in a L-shape
to prevent obstruction of the lumen due to bending.
- ② The loop shape absorbs body movements, reduces the burden on the renal pelvis, sutured part of the bladder, etc., and prevents a tube coming off.
- ③ A thick tube (8.5 Fr: 1.9 mm of I.D., 10 Fr: 2.1 mm of I.D.) prevents clogging.
- ④ A tube has no joints so urine flows without stagnation.
- ⑤ No accesses from outside the body provides a low risk of infection.

● Lumen obstruction is prevented by L-shape.

Tip length
For cats: 35 mm
For dogs: 40 mm

● Absorbing body movements leads to reduce the burden.

2 pcs of fixing plates
(They are attached to a tube.
Please use medical instant adhesive for fixing.)

Protective sheets

(They prevent fixing plates from bending.
Discard without using.)

Shape protection wire
(It keeps a tube straight.
Pull out and discard.)
